

# DEFIBETTER

**PROFIT ABOVE, BELOW OR WITHIN PRICE  
RANGES, WITHOUT ORDER BOOKS**

*defibetr.finace*

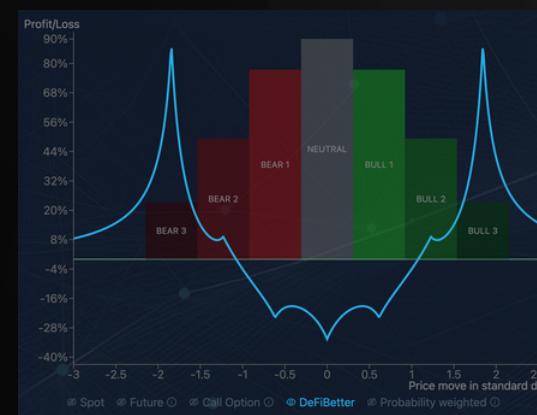

DeFi *Better*

The logo consists of the words "DeFi" in a black sans-serif font and "Better" in a blue cursive script font, enclosed within a circular frame with a blue double-line border.

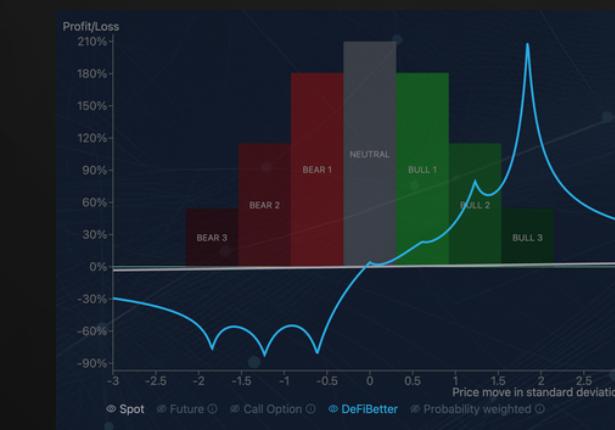

# What is DeFiBetter?

---

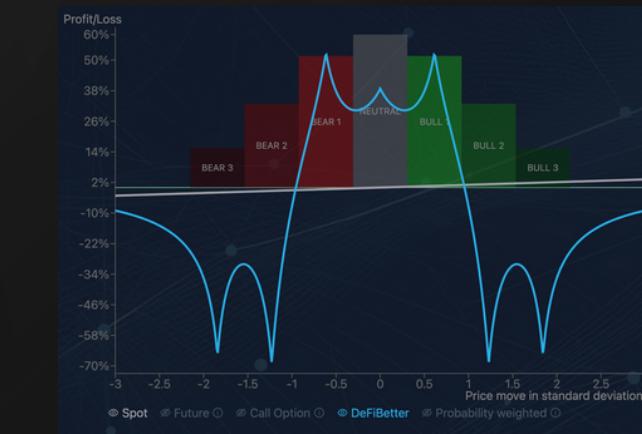

*DeFiBetter is a DeFi price prediction protocol that allows users to create their own strategies with unique return curves, participating using native gas tokens*

Example 1

Example 2

Example 3

# Features

## Profitability Widget

Map out profit potential before executing a strategy, with consideration of market sentiment and probability of profit

## Automated Strategy Vaults

Create and execute a long-term strategy to speculate or hedge

## Providing Liquidity

Provide liquidity to receive our fixed supply token \$BETR

## Short-term Speculation

Create and execute a short-term strategy for quick gains

## Staking for Real Yield

Stake our protocol token \$BETR to receive our protocol fees in native gas tokens

## Secondary Only-Up Token

Our small supply secondary \$DBMT token organically only appreciates in value

# Current Challenges

No real yield for  
holders in DeFi

## Our approach

DeFiBetter rewards  
holders in native gas  
tokens from our protocol  
fees. Our automated  
strategy vaults encourage  
consistent volume,  
optimising returns

Liquidity fragmentation, with  
extra costs to get filled in TradFi

## Our approach

DeFiBetter eliminates peer-  
to-peer order books,  
opting for an AMM-like  
model for derivatives  
instead, all while offering  
return curves familiar to  
options and futures traders

Trading fees cause losses  
on entry and exit

## Our approach

DeFiBetter only has fees  
on gains, attracting  
users by giving them a  
neutral start

# Growth Potential

We are filling a **HUGE** gap in the market! The demand for derivatives products in DeFi has been seen with the rise of GMX and the likes.

## Our Incentive Programs for Growth Acceleration

Milestone reward program (MRP)

Biggest gainer program

Presale referral program

# Target Audience

## Liquidity Providers

Supply liquidity to our liquidity pool to receive \$BETR (fixed supply)

## Day Traders

- Profit when you are more correct than other investors, rather than the entire market
- Our profitability widget helps day traders inform their decisions
- Leverage with no liquidations

## Institutional Hedgers

- Use DeFiBetter for precise, delta-neutral hedging
- Official partnerships available for fee reductions

## Scalpers

- Fast-paced gains with the added benefit of profiting in price ranges
- Profits easy to realise and keep, as we only have fees on gains

## Risk-Averse Investors

- Create low-risk strategies using our widget
- Stake \$BETR to receive protocol fees
- Hold our secondary \$DBMT token that only goes up in value

## Long-Term Investors

- Our \$BETR token accrues fees in native gas tokens
- Our secondary \$DBMT token appreciates exponentially, rewarding in native gas tokens

## Swing Traders

Advantageous returns and lower fees compared to the spot and futures markets, shown on our widget

## Options Traders

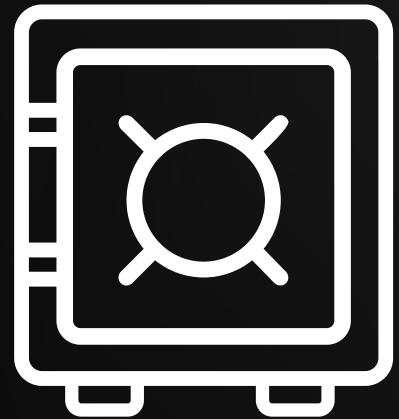

- Returns resemble options
- Implied max loss
- Fees only on gains, optimising returns

# Competitor Analysis

# Revenue Streams

## Long-Term Investor Vaults

Long-term, consistent fee generation through automated strategy vaults

## Short-term Speculator Fees

Fee generation through fast-paced, short-term speculators

## Institutional Capital Hedging

Institutions can use DeFiBetter to hedge their exposure for different assets

# Where are we at?

Q3, 2023

Q4, 2023

## Progress

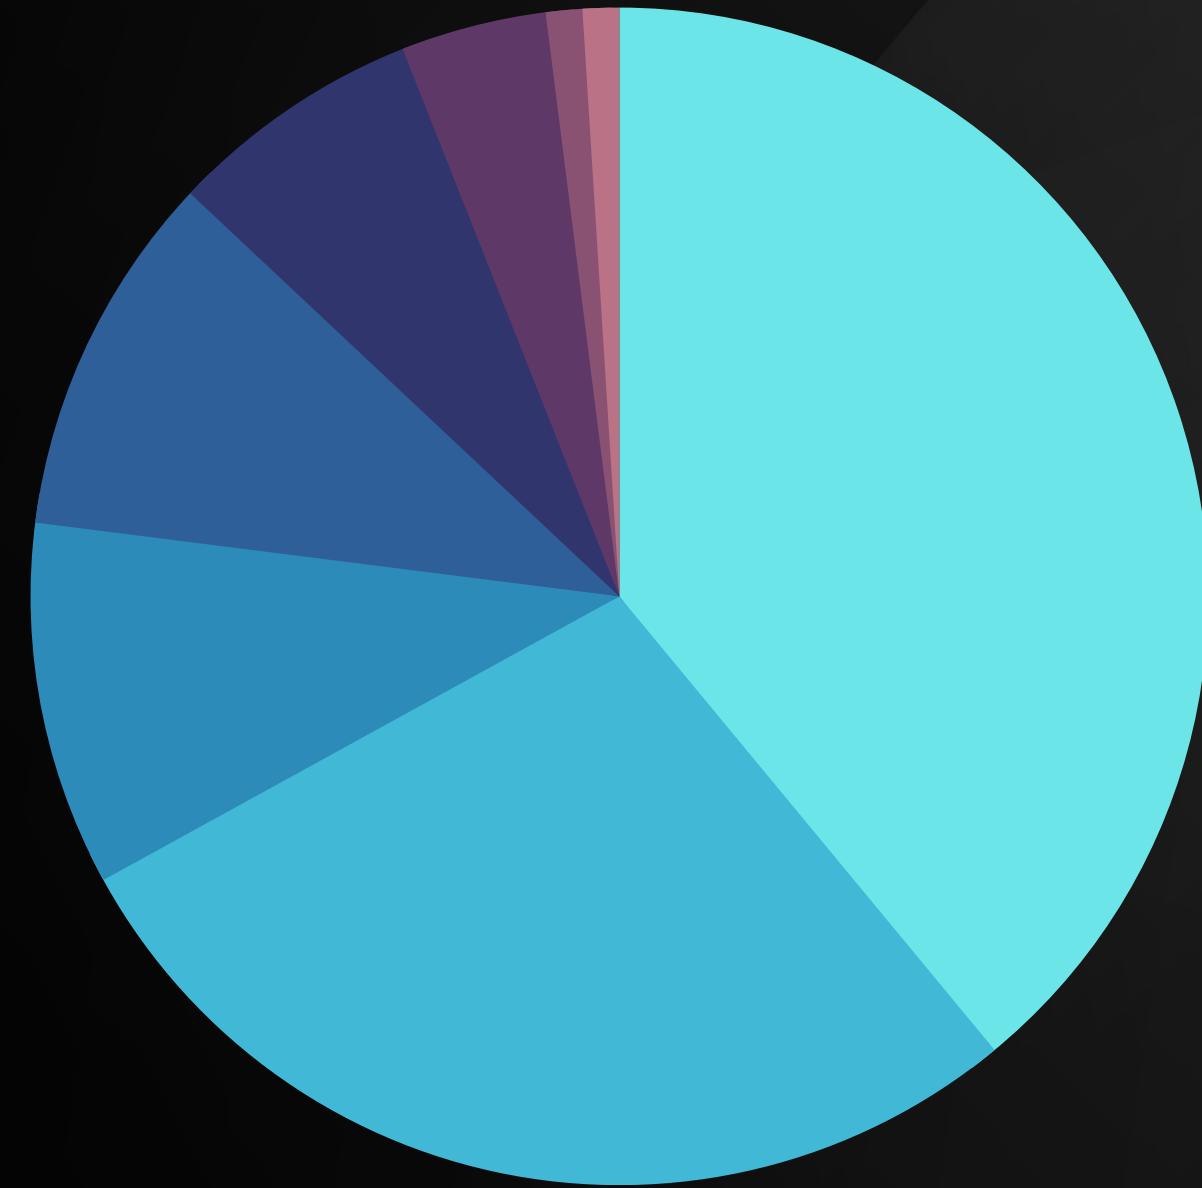

- Currently pre-launch, initial seed stage
- Development concluded (pre-release), profitability widget released
- AMAs: 2
- Community: 600+ members, ≈\$10k raised, presale referral program released, airdrops, contests, marketing material created, documentation released, social media released

## Current Objectives

- Secure \$200k in funding for initial audits and marketing
- More AMAs, KOL partnerships
- Competitions
- Significant community growth and expansion
- Official institutional and market maker partnerships
- Full launch

## Our \$BETR Token Distribution

Fixed total supply: 10,000

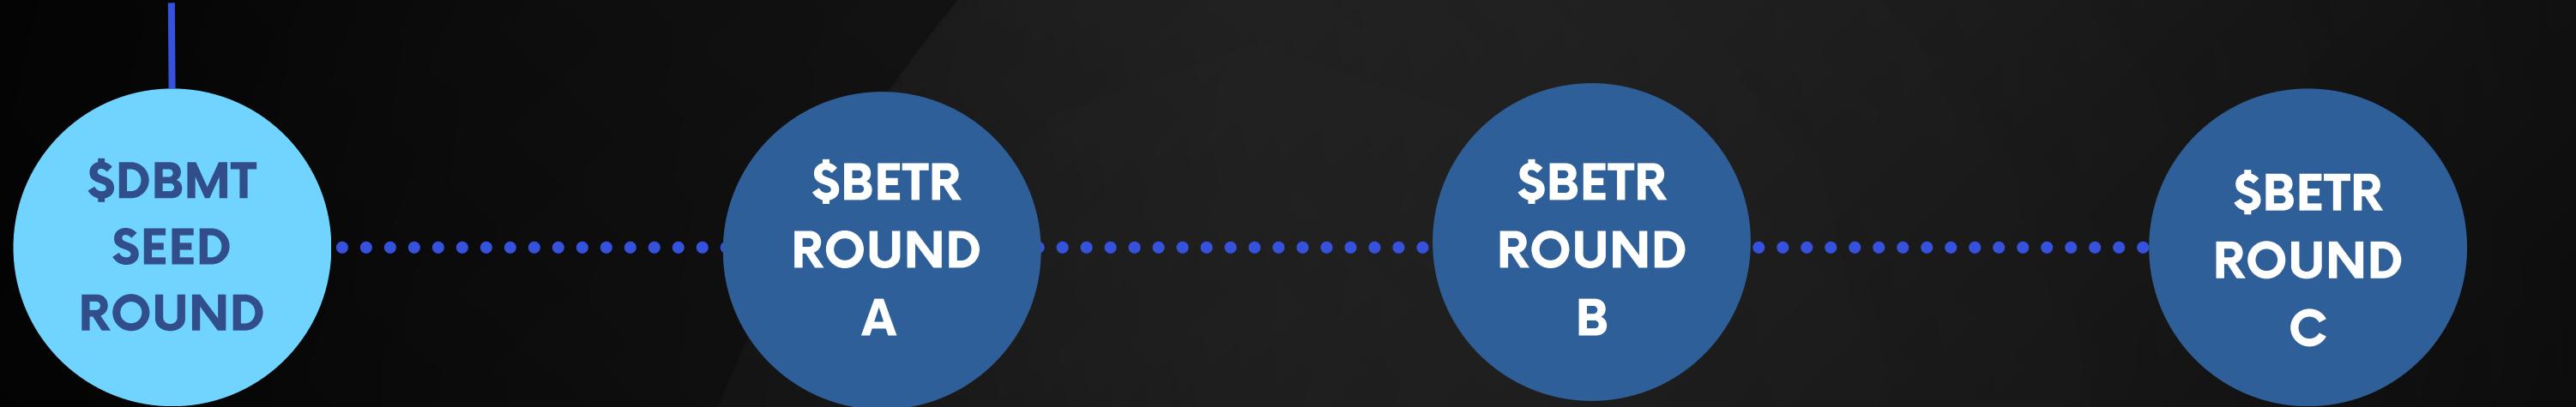

Role: Stake to receive protocol fees

- 39% public sales
- 28% protocol (locked, vested linearly over 24 months)
- 10% referral program (locked)
- 10% \$DBMT stakers
- 7% team (locked)
- 4% partnerships
- 1% POL
- 1% liquidity incentives

# Funding Rounds

We are here

**Price per token: \$2,500**  
**Tokens for purchase: 400**

Seed funds for initial high-quality, reliable third-party audit expenses, as well as some initial marketing

**TOTAL: \$1,000,000**

**Price per token: \$1,625**  
**Tokens for purchase: 65**

65% of launch price

Raise further funds for the project and encourage larger institutional participation

**TOTAL: \$105,625**

**Price per token: \$2,000**  
**Tokens for purchase: 25**

80% of launch Price

Raise further marketing funds and build anticipation for public sale

**TOTAL: \$50,000**

**Price per token: \$2,500**  
**Tokens for purchase: 3,857**

Launch Price

Raise funds for initial vault liquidity and further marketing

**TOTAL: \$9,642,500**

# Our Core Team

**Tennogi**

*Founder, Back  
End Developer*

- 10+ years experience as a software developer
- Experience in software development for finance (advisor systems, trading algorithms), B2B markets and cyber security
- 2 years experience as a Web3 developer (sniping, sandwich bots, audits, freelancing, own projects, etc.)
- Internationally connected with regulators

**Bunny**

*Back End  
Developer*

- 10+ years experience as a software developer
- 2 years experience as a Web3 developer (autocompounders, NFTs, proxies, etc.)

**Tazz**

*Front End  
Developer*

- Full stack developer for 12+ years
- 1 year experience as a Web3 developer

**Chance**

*Marketing, CM*

- Community manager for multiple sizeable projects in the past
- Well-connected in the community

# Legal Disclaimer

Please read this section of the document carefully. Consult legal, financial, tax, or other professional advisors if you are in any doubt about the action you should take. This document's information may not be exhaustive and does not simply any elements of a contractual relationship or obligations. While we make every effort to ensure that any material in this document is accurate and up to date, such material in no way constitutes professional advice. We do not guarantee nor accept any legal liability arising from the accuracy, reliability, currency, or completeness of any material contained in this document. No part of this document is legally binding or enforceable, nor is it meant to be. The author developed this document based on an evaluation method generally accepted by the cryptocurrency community (quantity theory of money and discounted cash flow analysis) and relies on a generally accepted school of economic thought (monetarist school of economics). It is important to note that the blockchain and cryptocurrency area is still very new. There is very little historical data, past performance results, or academic research on the topic of cryptocurrencies when compared to the historical data available for standard stocks and equities, let alone the lack of data available for tokenization, economics, and long-term valuations of these digital assets. Stocks (equity) have been around since the early 1600s, and it is only in the past 100 years that we have begun to have more comprehensive and widely accepted valuation models.

However, they are still subject to bias and interpretation and suffer from their inputs' quality. On the other hand, cryptocurrencies have been around since 2008, with a broader recognition around 2016 and an explosion in the number of tokens in 2017. As such, it is way too early to evaluate or comment on the performance, monetary policy, and models behind any of them. As a result, the author of the current document prefers to rely on sound economic principles backed by data and reasonable assumptions. Furthermore, the current model relies on several assumptions, forecasts, and requirements explicitly specified by the company behind the token offering. As such, this model is only as good as those assumptions are. Any significant deviation from the input numbers would subsequently impact the outputs of this model. The model presented here aims to provide a fair token price valuation based on the merits of the business behind it (as far as they are known/estimated at the time of the creation of this model) and cannot account for any possible speculative actions and market manipulation by any party as well as for irrational market behavior. None of the information or analyses in this document is intended to provide a basis for an investment decision, and no specific investment recommendation is made. This document does not constitute investment advice or an invitation to invest in any security or financial instrument. No regulatory authority has examined or approved any of the information set out in this document. No such action has been or will be taken under the laws, regulatory requirements, or rules of any jurisdiction. You acknowledge and agree that you are not using the information in this document for purposes of investment, speculation, as some type of arbitrage strategy, for immediate resale, or other financial purposes. Some of the document's statements include forward-looking statements that reflect our Current views concerning execution roadmap, financial performance, business strategy, and plans. All forward-looking statements address matters that involve risks and uncertainties and do not guarantee that these results will be achieved and may lead the actual results to differ materially from those indicated in these statements. No statement in this document is intended as a profit forecast. Given that the regulations for cryptocurrency in most countries at best are highly ambiguous or completely non-existent, each buyer is strongly advised to carry out a legal and tax analysis concerning the purchase and ownership of cryptocurrency and tokens according to their nationality and place of residence. Everything in this document is the author's own work. Some parts of this document, on non-project-specific texts, charts, graphics, and formulas, might be identical with other documents produced by the same author. These include but are not limited to the explanation of some formulas, modelling techniques, economic theories, and policies.
